## PHYSICS 21900 LAB SYLLABUS SPRING 2016

**Faculty:** 

Prof. Ronald Reifenberger – room 80, reifenbr@purdue.edu

**Textbook:** 

College Physics, Volume Two, Eugenia Etkina, Michael Gentile, Alan Van Heuvelen, Pearson, 2014.

#### **Lab Coordinator:**

Dr. Andrzej (*Andrew*) Lewicki - Room 142, lewicki@purdue.edu

#### Lab Manual:

Physics 21900, 22100 and 25200 Laboratory Manual, 2015/2016 (Spring 2016), Andrzej (Andrew) Lewicki, LAD Custom Publishing, 2015.

Welcome to **Physics 22100** laboratory. This semester, you will explore the fundamental concepts of electricity and magnetism by performing experiments, collecting data and analyzing your results.

#### General description:

Lab room is located in Physics Building (PHYS) - Room 150. The Lab manual (*Physics 21900, 22100 and 25200 Laboratory Manual, 2015/2016 (Spring 2016)*, Andrzej (*Andrew*) Lewicki, LAD Custom Publishing, 2015) is available in local bookstores. Please note that both Physics 21900, Physics 22100 and Physics 25200 courses use the same lab manual and have the same lab curriculum.

Students who completed Physics 21900 lab during the last two years may claim the previous credit for the lab. The minimum requirement for the credit transfer is to have all experiments completed and have the number of points for the lab equal to at least 75% of the maximum. To transfer lab points from the previous semester, go to see the <u>lab coordinator</u> with your Purdue ID <u>no later than at the end of the second week of classes</u>.

The answers to the conceptual questions are due at the beginning of the next experiment. For the exact dates, see the **lab schedule** at the end of this syllabus.

Always bring a calculator with you to the lab. Do NOT bring drinks or food to the lab!

The **help center** for Physics 21900 (and for Physics 22100) is located in **Room 11A** of the Physics Building. The exact schedule is available at the following address:

http://www.physics.purdue.edu/academic-programs/docs/help\_centers/HC219221.pdf

### Lab procedures:

Before coming to lab, you must answer all prelaboratory questions scheduled for that week. These questions are closely related to the activities and measurements you will do in lab. The prelaboratory questions typically require 20-30 minutes of effort. The prelaboratory questions are your individual work, so everyone is expected to complete them. The prelaboratory questions must be answered on-line (except of make-ups) using the MasteringPhysics (the same online software as you going to use for homework assignments - https://portal.mypearson.com/mypearson-login.jsp). If you exceed the number of allowed attempts for a prelab question, then you would not get credit for that question. In other words, no partial credit above the allowed number of attempts. The deadline for prelaboratory questions is on Monday 9:30 AM for all lab sections. No credit for late prelaboratory questions.

The prelaboratory questions must be completed and submitted <u>individually</u>. The lab reports from the lab make-ups must be submitted as individual reports (no group lab reports for make-ups).

During the two-hour laboratory period, you will observe phenomena, manipulate the lab apparatus, collect data and ask questions. Be on time for the lab. Remember to **sign the lab attendance list!** Your lab TA will briefly review the theory behind the experiment and describe the lab equipment to be used. **Before leaving the laboratory room, make sure that your TA has initialed your data sheets**. The minimum penalty for lab reports without TA's initials is 2 points. TA may even refuse to accept lab reports without initials.

In the Physics 21900 lab, you will work with a lab partner. In all data sheets, you will find a pair of parentheses with an empty space in between them: ( ). You are required to write appropriate **unit** in that space, e.g., ( $\Omega$ ). Results without units are not complete!

Write your name and your partner's name as well as the current date and time on the top of the first page of data sheets. Only one set of data sheets for you and your lab partner is required (with both names on the first page).

During the week that follows each lab experiment, you should type the answers to the two **Conceptual Questions** located at the end of each experiment (after the data sheets). Usually, you will not find the answers to conceptual questions in the lab manual. Instead, you should search textbook, other books available in libraries and online resources.

However, keep in mind that "copy and paste" method is not allowed! You are encouraged to search answers wherever you like, but you have to write answers in your own words. Simple "copy and paste" from internet will lead to a penalty.

In addition to answering Conceptual Questions, you are asked to write (typed) a short discussion of physics concepts related to the experiment. Briefly describe major physics principles, concepts and formulas that were applied or illustrated in this experiments. You should write how these concepts and physics principles apply to the measurements done this week. Do not simply write a report of what you did in the lab. Instead, focus on the concept summary, i.e., the message that should be remembered from this experiment. If the experiment included testing formulas, then discuss predictions of the formula with changing conditions (for example, explain how the results would change with an increase of velocity or decrease of the moving object mass, etc.) The whole text should not exceed one page and is due at the beginning of the next experiment.

Group lab reports are allowed (but not required) this semester. It means that only one lab report for you and your partner is required. Obviously, the same credit will be assigned to both lab partners. However, if a lab report is not ready on time, the penalty will apply to both students, regardless of who caused the delay. The cover sheets are located at the end of the lab manual. If you prefer to submit individual lab reports, you are always allowed to do that. Just tell your lab TA about your decision. The attendance will be taken at each experiment. Please, make sure to put your signature on the attendance list.

#### Grading practice:

Each laboratory report (<u>including prelabs</u>) is worth up to 12 points. We have nine labs scheduled for this semester (9 labs\*12 points = 108 points). This semester, we are <u>not</u> going to do experiment E9. Since the maximum number of points for the lab portion of Physics 21900 is not 108, the total lab score will be multiplied at the end of semester by a normalization factor. The score of 108 points for the lab (the perfect score) will translate into max. points allowed for the lab this semester (150). Check the course syllabus for information about how points are distributed among all course components (labs, homework assignments, exams, etc.) this semester.

Lab points <u>are not converted</u> into A, B, C, ... grades. At the end of the semester, the sum of your points earned for Physics 21900 (lab + recitations + exams) will be converted into one final letter grade.

If you have missed an experiment for a **valid reason** (e.g., illness):

- Give a <u>written</u> documentation to your lab TA <u>during the next</u> lab or bring it to his office and ask permission to make-up the missed lab.
- If you have not turned in the answers to the Conceptual Questions from the previous lab, turn it in <u>during the first day after your absence</u> to the drop slot located below mailboxes between rooms PHYS 146 and PHYS 150 (make sure that your lab <u>TA's name</u> is written clearly on the cover page).
- All lab make-ups are done in room PHYS 150 (Physics 21900, 22100, 25200 lab room) at the same day and time as regular classes.
- Prelabs for the make-up labs must be submitted on paper during the make-up session.
- If you have more questions about make-ups, please ask the lab coordinator.

**Subtracting 1 point per school day will penalize late lab reports**. Even if your lab report is very late, (i.e., zero points for the lab report due to the penalty) you would receive points for the prelaboratory questions and the lab would be recorded as completed.

Students are <u>not</u> allowed to make up more than one experiment during the scheduled lab make-up time. Re-doing labs is not possible. Make-ups are only for those who missed labs for a legitimate reason and got TA's <u>permission to make-up labs</u>.

Students are not allowed to copy answers, use "files", or make your answers available to any other students (except of your lab partner). Any violation of the above standards will subject the offender to penalties allowed by the Purdue University. If you wonder whether a course of action violates this policy, simply ask in advance. Any attempt to forge data (e.g., copying data from previous semesters or from other students) or to forge your TA's initials will be penalized!

In a case of a long illness, (e.g., two or more weeks in a hospital) you need to get permission from the lab coordinator to make up the missed labs.

If you have any questions concerning the lab policies, please ask the lab coordinator. **Keep all graded lab documents** until the end of semester.

After 5:00 PM on May 2, 2016, we will not accept any lab reports (no exceptions)!

# **Physics 21900 Laboratory - Spring 2016**

DATE	EXPERIMENT TITLE	REQUIRED
1/11	E1 - Introduction and Review of Vectors	No Prelaboratory Questions for E1
1/18	No Lab	
1/25	E2 - Electric Field Mapping	No Lab Report for E1 E2 Prelaboratory Questions (due 1/25)
2/1	Lab make-up for experiment E2	
2/8	E3 - Ohm's Law and Resistance	E2 Lab Report E3 Prelaboratory Questions (due 2/8)
2/15	E4 - Direct Current Circuits	E3 Lab Report E4 Prelaboratory Questions (due 2/15)
2/22	Lab make-up for experiments: E3, E4	
2/29	E5 - Magnetic Field	E4 Lab Report E5 Prelaboratory Questions (due 2/29)
3/7	E6 - Electromagnetic Induction	E5 Lab Report E6 Prelaboratory Questions (due 3/7)
3/14	SPRING BREAK	
3/21	Lab make-up for experiments: E5, E6	
3/28	E7 - Lenses	E6 Lab Report E7 Prelaboratory Questions (due 3/28)
4/4	E8 - Diffraction	E7 Lab Report E8 Prelaboratory Questions (due 4/4)
4/11	E10 - Photoelectric Effect	E8 Lab Report E10 Prelaboratory Questions (due 4/11)
4/18	E11 - Spectral Analysis	E10 Lab Report E11 Prelaboratory Questions (due 4/18)
4/25	Lab make-up for experiments: E7, E8, E10, E11	E11 Lab Report

After 5:00 PM on May 2, 2016, we will not accept any lab reports (no exceptions)!
